Dear Sir

I am against your Docket no;

96N-1230; 96P-0418; 97P-0197

I ask that the FDA must do more than put bacteria warning labels on our egg cartons and it must regulate egg refrigeration temperatures. also they should prohibit the practice of forced molting because forced molting has been scientifically shown to promote disease by destroying the starving hens immune systems and this is a very dangerous and it is cruelty to the hens. and the FDA has no jurisdiction to ban farm practices, such as forced molting, that injure us human health. FDA must ban this forced molting of laying hens because forced Molting is a primary cause of infectitious diseases in hens, their eggs, and consumers of eggs THIS CRUELTY AND CONTAMINATION ARE LINKED ! The FDA was petition in April 1998 to ban forced molting. This petition should be granted and passed immediately and without further delay. Stop this cruelty and diseases on us humans and the chickens

Yours Truly

Laura G. Riebeckey
